

"Awesome!"

This thumb rest provides an excellent and more importantly a repeatable location for your thumb. Highly recommended!

Manufactured in the U.S.A.

AI Thumb Rests

COMPATIBLE RIFLES: RIFLE FAMILIES

VERSION "AT" (requires a special metal threaded insert)

- Factory AIAT – folding stock only
- ATAICS – all folding stock variants, fixed stock variants in 300WM and 338LM ONLY
- Pre-14' factory AIAX – folding stock only
- Pre-14' AXAICS – folding stock only

VERSION "AX"

- Post-14' factory AX, AXMC – folding stock only
- Post-14' AXAICS – folding stock only

This bolt-on thumb rest provides a comfortable and repeatable thumb position on the strong side of the grip without permanent modifications to the chassis or plastic stock skins. The thumb rests are manufactured from composite Nylon 11 material, resulting in a strong, thin, and perfectly textured interface. Removal of the "locking" stock capture on the folding AX rifles is necessary to install the thumb rest. The buttstock will still fold 100% closed, but it will no longer utilize the plastic retaining piece.
