## CZ 455 Bolt Handle Replacement

Gives the shooter optimal handle manipulation while maintaining a comfortable cheek rest.

Stainless steel with black nitride coat option.

Longer length with added handle sweep allows for better control and function while operating the action.

Threaded bolt handle allows for addition of a custom bolt knob.

Use medium rings with dip rail.

Designed with low ring scope base.

Thread accepts any 5/16 x 24 bolt knob.

### "What Every CZ 455 Needs"

I bought this and the short dragon scale bolt knob for my CZ 455 after finding the stock bolt handle to be way too small and close to the scope when cycling the action. I wasn't sure how I felt about a swept back design but after using it on my rifle I absolutely love it. You can quickly transition from shooting to cycling the bolt with your index finger because of how it's placed.
