CZ Bottom Metal

Anarchy Outdoors exclusive: The CZ 457 bottom metal, now available with or without the integrated small barricade stop. Each piece is manufactured from 7075 aluminum and anodized black to add that flare to your competition .22 rifle. The bottom metal adds rigidity for increase accuracy as the user can tune the accuracy by adjusting the torque on the action screws*. The biggest game-changer with this the integrated barricade stop. By having it built as part of the bottom metal it provides extra strength and rigidity. Included with the package is an additional extra, our own extended magazine release to aid in quick change out of your magazine while maintaining your eye on the target during mag change outs.

*May require some small fitting on aftermarket stocks.
