

"Great swap for the original part."

"This is a much nicer piece and the finish matches the bolt perfectly. I went ahead and got the model with the tool and am glad I did. It's far superior to Ruger's plastic version. This bolt shroud makes the bolt feel stronger and gives me more confidence. I'd recommend it to anyone wanting to make small improvements to a great rifle."

Ruger Precision Bolt Shroud Replacement

ANARCHYOUTDOORS.COM

Tighter fit reduces play and rattle with the bolt vs factory shroud

Polished Titanium or Type 2 Class 3 Anodization finish for added style and durability

A bolt shroud made of titanium balances out the bolt weight and enhances the throw during bolt manipulation. This increases the throw and speed of cycling your shot as well as reducing the possibility of binding.

17-4 Stainless steel firing pin removal tool vs plastic factory tool

Available in Polished Titanium or Black Anodized Aluminum

- Available in solid or fluted styles
- Available with embedded firing pin removal tool
- Available for short action or magnum calibers

The Ruger Precision Rifle Bolt Shroud Replacement is the only aftermarket complete factory shroud replacement. The RPR comes with plastic tool that is prone to breaking. The Ruger Precision Rifle Bolt Shroud Replacement comes with the option to add a self contained stainless steel firing pin tear down tool. All our parts are guaranteed for life.
